VERSA APTITUDE

MAINSTREAM PERFORMANCE FOR BUSINESS AND MULTIMEDIA APPLICATIONS

MULTIMEDIA POWER

Powered by a mobile Intel® Pentium® III processor with SpeedStep™ technology, the VERSA APTITUDE is designed to handle today's multimedia-rich applications. It is available with a choice of CD-ROM, DVD-ROM or CD-RW drives, a 14.1" TFT display and 8MB video memory. Its TV-out capabilities let you watch DVD movies on a TV, while the IEEE-1394 connector lets you hook up a digital video (DV) camera.

ERGONOMIC DESIGN

Weighing as little as 2.8 kilograms (12.1" TFT) and measuring a mere 39.5 mm in width, the VERSA APTITUDE is stylish and highly portable. Its three-spindle design includes an upgradeable 10GB hard drive (20GB max.), media drive and floppy drive. In terms of ergonomics, the Internet keys give you one-touch access to e-mail and the web. Complementary to the touchpad, there is also a scroll button. The Audio DJ feature lets you play audio CDs with the power off, while the media buttons let you control CD-ROM or DVD playback. Last but not least, you can choose between several colored palm rests.

TOTAL FLEXIBILITY

VERSA APTITUDE works with you, not against you. It comes standard with a built-in 56K V.90 data/fax modem, or a mini PCI Combo. It can be ordered with Windows 98 Second Edition or Windows 2000 professional. Wireless options are available for wireless freedom in a LAN environment.
